Technical Skills

Frontend: React, TypeScript, JavaScript, HTML/CSS, Tailwind, Vite

Backend: Node.js, Express, REST APIs, JWT Auth

Database & Tools: PostgreSQL, Prisma, Git, GitHub, Jest

Projects

Postifly - Full-Stack Blogging Platform

postifly.blog

React • Node.js • Express • PostgreSQL • Prisma ORM

- Developed a full-stack blogging platform featuring JWT-based authentication, protected routes, and secure password hashing
- Built RESTful APIs and relational database models to support posts, comments, likes, and user sessions

PokeMem - Pokemon Memory Game

poke-mem-xi.vercel.app

React • JavaScript • PokeAPI • SASS

- Built an interactive memory game using dynamic data fetched from the PokeAPI
- Implemented randomized card shuffling, score tracking, and duplicate selection prevention logic

Battleship - Turn-Based Strategy Game

battleship-eight.vercel.app

JavaScript • Jest • Object-Oriented Programming

- Developed a turn-based Battleship game using modular object-oriented JavaScript architecture
- Implemented game board logic, ship placement systems, turn management, and AI opponent behavior

Education

University of Houston / Management Information Systems

2016 - 2020, Houston, TX
